6 LEASES

Leases relate principally to corporate offices and the mining fleet at the Segilola mine. Corporate offices are depreciated over 5 years and mining fleet is depreciated using the units-of-production method, which reflects the pattern in which the economic benefits of the assets are consumed over the life of the mine.

The key impacts on the Statement of Comprehensive Income and the Statement of Financial Position for the period ended March 31, 2026, were as follows:

The restoration costs provision is for the site restoration at Segilola Gold Project in Osun State Nigeria. The value of the above provision is measured by unwinding the discount on expected future cash flows using a discount factor that reflects the credit-adjusted risk-free rate of interest.

It is expected that the restoration costs will be paid in US dollars, and as such US forecast inflation rates of 2.5% and the interest rate of 3.75% on 3-year US bonds were used to calculate the expected future cash flows, which are in line with the life of mine. The provision represents the net present value of the best estimate of the expenditure required to settle the obligation to rehabilitate environmental disturbances caused by mining operations at mine closure.

The fleet demobilization costs provision is the value of the cost to demobilize the mining fleet upon closure of the mine.

a) Douta Gold Project, Senegal:

The Douta Project consists of 3 licences, a 100% interest in Demande 11618 and licence EL03709 and a 70% interest in the Bousankhoba Exploration Permit EL03720.

In 2025 and early 2026, the Group entered into binding sale and purchase agreements to acquire the remaining 30% minority interests in Demande 11618 from International Mining Company SARL ("IMC") and in EL03709 from Birima Gold Resources, each subject to conditions precedent including final approval from the Minister of Mines which remained outstanding at March 31, 2026. Total consideration for Demande 11618 comprises cash of \$3.0 million (50% paid on signing and 50% in December 2025) and a 1.25% average net smelter royalty capped at \$60.0 million, while consideration for EL03709 comprises cash of \$5.0 million (of which \$1.5 million was paid on signing) and a 1% average net smelter royalty capped at \$7.0 million. As completion of both acquisitions remains subject to conditions precedent, the cash consideration paid to date of \$3.0 million for Demande 11618 and \$1.5 million for EL03709 has been recognized as a prepayment within trade and other receivables at March 31, 2026 (see Note 5). Bousankhoba, which covers approximately 30 kilometers of continuous soil geochemical anomalies and has been subject to limited historical early-stage drilling, is subject to an earn-in arrangement that includes a payment of US\$160 thousand.

In accordance with applicable local mining regulations, the State is entitled to a 10% free carried interest in the project upon commencement of exploitation.

b) Lithium exploration Licenses, Nigeria

Following the impairment recognized as at December 31, 2025, the Group has not capitalized any further exploration and evaluation expenditures in respect of its lithium licence areas during the period.
